Q1. Read the passage and answer the questions:

One of the world's great educationists, who looked up to a child as an individual and a very special human being was Maria Montessori. She gave the very young children the stimulating kindergarten, where children grew in an atmosphere of freedom and confidence. Maria Montessori was born in Chiaravalle near Ancona, Italy in 1870. As a little girl, she was a dull student, unable to grasp and detained what her teacher taught her. At the age of 10, she suddenly changed. Besides her heightened interest in religion, she felt she had a long way to go. Maria began topping her class and her parents felt that she should become a teacher but she was determined to become an engineer. At the age of 14, she attended a technical school for boys. After a year she took up Biology and decided to study medicine.

1. What did Maria Montessori give to the very young children?

Q2. Read the passage carefully:

The buildings that we live and work in have a major impact on the environment since they consume energy and resources, and create waste. There are countless studies which show a direct correlation between an occupant's health and adequate daylight and ventilation. With our life style and in the majority of our time spent indoors, the design of our spaces is of great importance.

Over the last few years the term 'Green Building' has been used extensively by everybody. It implies these projects have incorporated measures like energy saving, water conservation and ventilation. The important thing to remember is that when we decide to build or buy a new home or office, we must ensure that it is Green -Certified. Secondly, even if your current space is not designed according to Green standard, you can still protect the environment by adopting a few simple strategies.

- **Read the following passage and answer the questions that follow:**

1. During the Gulf War, a few years back, tens of thousands of seabirds were killed due to oil spills. Do you know what makes crude oil on ocean water so deadly?
2. Crude oil is not used in the same state it is produced at the off-shore wells. It is converted in refineries into a wide range of products such as gasoline, kerosene, diesel, fuel oils, and petrochemical feed-stocks. Before it is refined, the oil also contains potentially fatal components.
3. Crude oil is made up of compounds of carbon and hydrogen called hydrocarbons. These hydrocarbons may be paraffin - the oil that is used as fuel in heaters and lamps, or cycloparaffins (naphthenic), or aromatic compounds, in varying proportions. While crude oil found in the US is mostly paraffinic, that found along the Gulf Coast are naphthenic, which contain sulphur compounds in varying amounts, a small amount of nitrogen and very little oxygen. Every variety of crude oil has nickel and vanadium in high concentration. Iron may be found in organic form due to the corrosion of pipes. Paraffin like methane and ethane are asphyxiates; Substances that cause suffocation.
4. The effects of cycloparaffins are more or less similar to those of the paraffin but unsaturated paraffin is more noxious than the saturated ones. The sulphur present in crude oil may be toxic. The mechanism of toxic action seems to involve its breakdown to hydrogen sulphide. They will act primarily on the nervous system with death, resulting mainly from respiratory paralysis. Sulphur in the form of aromatic thiophenes, benzothiophenes can damage the livers and kidneys of sea animals. Sulphur compounds like mercaptans can be very dangerous too.

- On the basis of your reading of the passage, answer the questions:

- (a) How were Thousands of sea birds killed?
- (b) What are the primary components of crude oil?
- (c) What is Paraffin is used for?
- (d) What is the effect of the Sulphur on sea animals?
- (e) What does every variety of crude oil contain in excess?
- (f) Asphyxiates cause death by _____
- (g) Find a word similar to 'unprocessed'
- (h) Find a word for relating to a solution in which the solvent is capable of dissolving still more of the 'solute' (Para 4)
- (i) The word 'refined' means _____
(a) pure (b) impure (c) Fine (d) nice
- (j) Sulphur compounds like _____ can be dangerous too.
